Variable costs are costs that change as the quantity of the good or service that a business produces changes. Variable costs are the sum of marginal costs over all units produced. They can also be considered normal costs. Fixed costs and variable costs make up the two components of total cost. Direct costs are costs that can easily be associated with a particular cost object.

1. Introduction. Empirical research on conditional conservatism documents a piecewise linear relation between earnings and stock returns and often attributes this pattern to a more timely recognition of bad news than good news (e.g., Basu, 1997). However, we argue that a similar asymmetric relation can arise from a fundamentally different source—cost stickiness.

The confounding effect of cost stickiness on conservatism ...
