The Achilles tendon or heel cord, also known as the calcaneal tendon, is a tendon of the back of the leg, and the thickest in the human body. It serves to attach the plantaris, gastrocnemius (calf) and soleus muscles to the calcaneus (heel) bone. These muscles, acting via the tendon, cause plantar flexion of the foot at the ankle, and (except soleus) flexion at the knee.

Achilles tendon - Wikipedia

An ingrown toenail or onychocryptosis may occur at any age and is the mostly commonly encountered toenail problem likely to be seen in general practice. 1-3 The dashed line indicates the section of the nail plate to be removed for conservative treatment Often the medial or lateral nail edge of an ...
