Financial modeling is the task of building an abstract representation (a model) of a real world financial situation. This is a mathematical model designed to represent (a simplified version of) the performance of a financial asset or portfolio of a business, project, or any other investment.. Typically, then, financial modeling is understood to mean an exercise in either asset pricing or ...

where  $(\psi k)'$  are specified values. Which parameters are fixed, and the levels of the specified values can depend on accounting choices. For example,  $\psi_2$  can be the level of a publicly visible cost which the firm has committed to at date 1, but which is not incurred until date 2. An investor who does not attend neglects the cost and sets  $\psi_2 = (\psi_2)' = 0$ .
