Flight Dynamics takes a new approach to the science and mathematics of aircraft flight, unifying principles of aeronautics with contemporary systems analysis. While presenting traditional material that is critical to understanding aircraft motions, it does so in the context of modern computational tools and multivariable methods.

Computer - History of computing: A computer might be described with deceptive simplicity as "an apparatus that performs routine calculations automatically." Such a definition would owe its deceptiveness to a naive and narrow view of calculation as a strictly mathematical process. In fact, calculation underlies many activities that are not normally thought of as mathematical.

Software Availability. All software and a manual (Heat Transfer Tools) consisting of about 100 pages of documentation were originally published by McGraw-Hill in July 2001. In addition to the software, the CD-Rom includes about 60 additional pages in "pdf" files detailing the numerical modeling used "behind the scenes," making these materials very appropriate for use at the graduate level as ...

Modern aerodynamics only dates back to the seventeenth century, but aerodynamic forces have been harnessed by humans for thousands of years in sailboats and windmills, and images and stories of flight appear throughout recorded history, such as the Ancient Greek legend of Icarus and Daedalus. Fundamental concepts of continuum, drag, and pressure gradients appear in the work of Aristotle and ...

style in technical writing. use of units with numbers. All numerical values that have dimensions must have their units specified. In general, the units must follow the numerical value every time. However, in a table of numbers, the units may be specified at the top of the column, provided all of the values have the same units.

Definition. A matrix is a rectangular array of numbers or other mathematical objects for which operations such as addition and multiplication are defined. Most commonly, a matrix over a field F is a rectangular array of scalars each of which is a member of F . Most of this article focuses on real and complex matrices, that is, matrices whose elements are real numbers or complex numbers ...
