Microeconomics And Behavior Frank 5th

Microeconomics (from Greek prefix mikro-meaning "small" + economics) is a branch of economics that studies the behaviour of individuals and firms in making decisions regarding the allocation of scarce resources and the interactions among these individuals and firms.. One goal of microeconomics is to analyze the market mechanisms that establish relative prices among goods and services and ...

Microeconomics - Wikipedia

In economics, a factor market is a market where factors of production are bought and sold, such as the labor market, the physical capital market, the market for raw materials, and the market for management or entrepreneurial resources.. Firms buy productive resources in return for making factor payments at factor prices. The interaction between product and factor markets involves the principle ...
