This is a short introduction in how to interact with SageMath. Make sure you have installed it according to the installation guide. There are also nice Screencasts for introduction available. Make sure to read more about SageMath in the SageMath Tutorial!

SageMath - Tour - Quickstart

Matching features across different images is a common problem in computer vision. When all images are similar in nature (same scale, orientation, etc) simple corner detectors can work. But when you have images of different scales and rotations, you need to use the Scale Invariant Feature Transform.

The WSR-88D measures radial velocities in addition to reflectivity by measuring the Doppler effect on the radar beam. The Doppler effect is that when a target (usually precipitation in the case of a weather radar) is moving away from the radar, the wavelength of the return echo is longer than that of the emitted electromagnetic pulse.
