This is the common problem on the mercury fuel line with red writing on the fuel line . The fuel line has been updated by mercury and now has blue writing on the fuel line .

Mercury fuel line problems

When the engine is in the run state, the PCM calculates the fuel consumed to determine when to turn the lift pump on. On a Verado based engine, the PCM will not cycle the lift pump until it has counted 150 grams of fuel used. On a 75-115, the PCM will not cycle the lift pump until it has counted 60 grams of fuel used.

Optimax Fuel Injection - Moderated Discussion Areas

Optimax Fuel Rail Assemblies Fuel Rails are simple yet they can fail. The most common cause of failure is from corrosion and/or water intrusion. Only the Port Fuel Rail is water cooled but in the event of a failure, water will pass through to the starboard fuel rail. A bad Air Compressor head seal can force water into the fuel rails.
