History. Science Research Associates Inc. was founded in 1938. Early on, it had a trade and occupational focus. In 1957, it moved into individualized classroom instruction with the iconic SRA Reading Laboratory Kit, a format that later translated to mathematics, science, and social studies. Commonly called SRA cards, the labs were large boxes filled with color-coded cardboard sheets.

Conventional Treatment. Conventional wastewater treatment consists of preliminary processes, primary settling to remove heavy solids and floatable materials, and secondary biological aeration to metabolize and flocculate colloidal and dissolved organics. Waste sludge drawn from these operations is thickened and processed for ultimate disposal, usually either land application or landfilling.
