3.1.. Richard BarrerThe first consideration of synthesis mechanism was that given by Barrer, Baynham, Bultitude and Meier in 1959. The discussion section of a paper in which a wide variety of alumino-, gallo- and germano-silicates were synthesised begins as follows: "The formation of diverse kinds of structural framework leads to questions as to the mechanism of growth.

Why mechanism of action is important. Elucidating the mechanism of action of novel drugs and medications is important for several reasons: In the case of anti-infective drug development, the information permits anticipation of problems relating to clinical safety. Drugs disrupting the cytoplasmic membrane or electron transport chain, for example, are more likely to cause toxicity problems than ...
