Cloud Application Architecture Guide E-Book | Microsoft Azure

Architecture styles. An architecture style is a family of architectures that share certain characteristics. For example, N-tier is a common architecture style. More recently, microservice architectures have started to gain favor. Architecture styles don't require the use of particular technologies, but some technologies are well-suited for certain architectures.

Microsoft - Wikipedia

Microservices are an architectural and organizational approach to software development where software is composed of small independent services that communicate over well-defined APIs. These services are owned by small, self-contained teams. Microservices architectures make applications easier to scale and faster to develop, enabling innovation and accelerating time-to-market for new features.
