Gram-positive bacteria are bacteria that give a positive result in the Gram stain test, which is traditionally used to quickly classify bacteria into two broad categories according to their cell wall.. Gram-positive bacteria take up the crystal violet stain used in the test, and then appear to be purple-coloured when seen through a microscope. This is because the thick peptidoglycan layer in ...

1. Introduction and goals of neural-network research. Generally speaking, the development of artificial neural networks or models of neural networks arose from a double objective: firstly, to better understand the nervous system and secondly, to try to construct information processing systems inspired by natural, biological functions and thus gain the advantages of these systems.

Neural networks: An overview of early research, current ...

Carers play a vital role in supporting family members who are sick, infirm or disabled. ¹ There is no doubt that the families of those with mental disorders are affected by the condition of their near ones. Families not only provide practical help and personal care but also give emotional support to their relative with a mental disorder.

Review Article | British Journal of Medical Practitioners

Genetic links. It is worth noting that certain types of AN may be genetically linked. ³⁶ The interaction of genes and the environment is not clearly understood and the different variables of DM type 2 are not established. It is a heterogenous disorder and there is a general consensus that diabetic comorbidities may be the outcome of genetic and environmental susceptibilities. ^{37,38,39,40,41} ...
