The philosophy of mathematics is the branch of philosophy that studies the assumptions, foundations, and implications of mathematics, and purports to provide a viewpoint of the nature and methodology of mathematics, and to understand the place of mathematics in people's lives. The logical and structural nature of mathematics itself makes this study both broad and unique among its philosophical ...

Students will be able to access their course eTextbooks or Digital Content on the first day of classes through their online course. However, they are also given the opportunity to Opt-Out of using the Digital Text during the first two weeks of class which will cause them to lose access to the Digital Text. They will then be responsible for obtaining a print copy of the text.

In mathematics education, ethnomathematics is the study of the relationship between mathematics and culture. Often associated with "cultures without written expression", it may also be defined as "the mathematics which is practised among identifiable cultural groups". It refers to a broad cluster of ideas ranging from distinct numerical and mathematical systems to multicultural mathematics ...
