To reiterate, my motive for creating this website is to help authors, game designers, and programmers get the science correct in their creations (thus increasing the amount of the kind of science fiction I enjoy). The most striking examples are those novels whose authors I directly assisted. But there are a few creations I've run across that did get the science correct without any help from me.

In a passive solar heating system, the aperture (collector) is a large glass (window) area through which sunlight enters the building. Typically, the aperture(s) should face within 30° of true south and should not be shaded by other buildings or trees from 9 a.m. to 3 p.m. each day during the heating season.
