1. Introduction. As foreign banks' presence has increased sharply over the last two decades the question of the performance and financial strength of these banks, as well as the allocation of their loan portfolios, has become particularly relevant, especially in developing countries where capital markets are under-developed and SMEs face high financing constraints.

A monopoly (from Greek *μόνος*, *mónos*, 'single, alone' and *πωλεῖν*, *pōleîn*, 'to sell') exists when a specific person or enterprise is the only supplier of a particular commodity. This contrasts with a monopsony which relates to a single entity's control of a market to purchase a good or service, and with oligopoly which consists of a few sellers dominating a market.
