Non-price competition is a marketing strategy "in which one firm tries to distinguish its product or service from competing products on the basis of attributes like design and workmanship"  
(McConnell-Brue, 2002, p. 43.7-43.8). The firm can also distinguish its product offering through quality of service, extensive distribution, customer focus, or any sustainable competitive advantage other ...

Monetary economics is the branch of economics that studies the different competing theories of money. It provides a framework for analyzing money and considers its functions, such as medium of exchange, store of value and unit of account. It considers how money, for example fiat currency, can gain acceptance purely because of its convenience as a public good.

The economic analysis of projects goes back at least to the 1930's with the evaluation of U.S. federal water development projects. Since that time, economic analysis has been integrated into the decision making process of most if not all U.S. federal agencies and influenced issues ranging from nuclear power to environmental regulation.
