Evolutionary psychology is a theoretical approach in the social and natural sciences that examines psychological structure from a modern evolutionary perspective. It seeks to identify which human psychological traits are evolved adaptations – that is, the functional products of natural selection or sexual selection in human evolution. Adaptationist thinking about physiological mechanisms ...

Evolutionary psychology - Wikipedia

The field of psychology commonly uses experimental methods in what is known as experimental psychology. Researchers design experiments to test specific hypotheses (the deductive approach), or to evaluate functional relationships (the inductive approach).. The method of experimentation involves an experimenter changing some influence—the independent variable(IV)— on the research subjects ...
