A AA6061 Aluminium alloy 6061 (not subject to sustained load cracking). Currently (2012) used for manufacture of new diving cylinders. AA6351 Aluminium alloy 6351. This alloy is subject to sustained load cracking and requires periodical eddy current testing. No longer used for new cylinder manufacture, but many cylinders of this alloy are still in service.

Glossary of underwater diving terminology - Wikipedia

A disease is a particular abnormal condition that negatively affects the structure or function of part or all of an organism, and that is not due to any external injury. Diseases are often construed as medical conditions that are associated with specific symptoms and signs. A disease may be caused by external factors such as pathogens or by internal dysfunctions.

Disease - Wikipedia
