I was offered an elderly Metcal soldering iron and control unit at a UK rally yesterday. My Pace station fails this test, I have to wait a goodly while for the iron to build Cannot find the manual where this is

Metcal Soldering Station Manual - WordPress.com

A soldering iron is a tool with a metal tip that gets really hot. We're talking like 800 degree Fahrenheit, though you can adjust the temperature on a good iron. Its job is to transfer heat to things like wires, transistor leads, and pads on PCBs. After the appropriate areas are heated properly, solder is applied.

How to Use a Soldering Iron: A Beginner's Guide
