Impact Factor - What is it?; Why use it? The impact factor (IF) is a measure of the frequency with which the average article in a journal has been cited in a particular year. It is used to measure the importance or rank of a journal by calculating the times its articles are cited.

Journal Impact Factor (IF) - Measuring Your Impact: Impact ...

The impact factor (IF) or journal impact factor (JIF) of an academic journal is a measure reflecting the yearly average number of citations to recent articles published in that journal. It is frequently used as a proxy for the relative importance of a journal within its field; journals with higher impact factors are often deemed to be more important than those with lower ones.

Impact factor - Wikipedia

Impact Factor is a measure of the frequency with which the "average article" in a journal has been cited in a given period of time. The impact factor is used as standard dimension and the relative importance of a scientific journal within its field.

Impact Factor | Citefactor.org-Journal|Research Paper ...

I first mentioned the idea of an impact factor in Science in 1955. 1 With support from the National Institutes of Health, the experimental Genetics Citation Index was published, and that led to the 1961 publication of the Science Citation Index. 2 Irving H. Sher and I created the journal impact factor to help select additional source journals. To do this we simply re-sorted the author citation ...
