The history of mathematics can be seen as an ever-increasing series of abstractions. The first abstraction, which is shared by many animals, was probably that of numbers: the realization that a collection of two apples and a collection of two oranges (for example) have something in common, namely quantity of their members. As evidenced by tallies found on bone, in addition to recognizing how to ...

16 December 2014 10:36 The benefit of having a well planned and illustrated common text from which to teach maths is probably not in dispute. What we need reassurance on is whether such an outdated medium is capable of engaging 21st century pupils, especially 5-7 year olds who have come to expect inspiration from the interactive whiteboard.
