If the query determines that there is an inconsistency between a table and an index, then you can use an ANALYZE statement for a thorough analysis of the index. Since typically most objects in a database are not corrupt, you can use this quick query to eliminate a number of tables as candidates for corruption and only use the ANALYZE statement on tables that might be corrupt.

Human overpopulation (or population overshoot) occurs when the ecological footprint of a human population in a specific geographical location exceeds the carrying capacity of the place occupied by that group. Overpopulation can further be viewed, in a long term perspective, as existing if a population cannot be maintained given the rapid depletion of non-renewable resources or given the ...

Human Resources Software - Manage Employee Information

Resources – If we change the "system" used in the project, then "people" might be impacted. For example, if additional information security regulation and policy/compliance requirements were added to the project, then we might need to consider adding an information security expert to the project to ensure that new IS requirement are met.
